Re: TRS Fund—Drastic VRS Rate Cuts

Dear Chairman Martin,
Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

Signature

Re: TRS Fund—Drastic VRS Rate Cuts

Dear Chairman Martin,
Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the numbers of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service,

The VRS rate should encourage the VRS providers to:

1. Serve more deaf people, not discourage them from reaching out to more deaf people.
2. Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities.
3. Provide service and technology improvements, such as the Disabilities Act (ADA) mandate of functionally equivalent telecommunications services.

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,
Signature

**Dear Chairman Martin,
Commissioners Adelstein, Copps, McDowell, and Tale:**

I am very happy to use Video Relay Service (VRS) to communicate to any business or doctors. I can not use TTY/TDD talk to Relay Center because my hands are hurting to type.

The fact is that Relay Center using TTY/TDD talking to so many low education persons, neither of them understand each other.

Interpreters do understand each other by using Video Relay Service (VRS).

Many of the low education persons are so happy to use Video Relay Service.

I prefer that you can cut TTY/TDD Relay Centers, and provide more of Video Relay Service.

Most of the business answering machine talking too fast for Relay Center as they can not typing that fast. Like the company tell us to pressing which number. I have to ask for a live person.

I understand Video Relay Service that the company tell me to press which number.

I repeat as to please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

Marion Wright
